

RUDRANSHU PANDEY

Sonebhadra, India • +91-9569610530 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

B.Tech CSE (AI & ML) student who builds full-stack, AI-agent-driven applications end to end — API and UI through to Docker/Cloud Run deployment. Comfortable across Python, JavaScript/TypeScript, React, and FastAPI.

SKILLS

Languages: C++, C, Java, Python, JavaScript / TypeScript, SQL

ML & Data: scikit-learn, Pandas, NumPy, Machine Learning, SHAP

Frameworks & Tools: React, Next.js, FastAPI, Flask, Streamlit, Tailwind CSS, Git, Linux

Cloud & DevOps: Docker, Google Cloud Run, MySQL

AI APIs: OpenAI (GPT-4o), Google Gemini

EXPERIENCE

3Skills — Web Development Intern

May 2026 – Jul 2026

- Designed and built 2–3 responsive web application projects using HTML, CSS, and JavaScript, focusing on clean, mobile-friendly user interfaces.
- Strengthened core front-end skills — responsive layout, DOM manipulation, and debugging

Smartbridge — Java Developer Intern

Mar 2025 – Apr 2025

- Developed RESTful backend services using Java, Spring Boot, SQL, HTML, CSS, and JavaScript.
- Strengthened practical understanding of backend development, database integration, and software development lifecycle through hands-on implementation.

PROJECTS

VoteReady — AI Election Guide for First-Time Indian Voters

[\(GitHub\)](#) 2026

- Built a mobile-first full-stack app (Next.js + FastAPI): voting guidance, eligibility checks, FAQs, and document-verification workflows.
- Integrated a context-aware GPT-4o assistant with session memory, step-aware prompting, and neutrality guardrails; deployed via Docker on Google Cloud Run.
- Stack:** Next.js, TypeScript, Tailwind, FastAPI, OpenAI API, Docker, Cloud Run.

AI Hint System — Open-Source Contribution (Algo-Infinity-Verse) #400

[\(GitHub\)](#) 2026

- Contributed a progressive AI hint system: a React module plus a server-side `/api/hint` endpoint calling Gemini, with the API key kept server-side.
- Debugged live routing, CSRF, and merge issues; delivered through a full fork → branch → pull-request workflow.
- Stack:** JavaScript, Node.js, Google Gemini API, Git.

Solar Panel Efficiency Predictor — ML Pipeline + Streamlit

[\(GitHub\)](#) 2025

- Built an end-to-end ML pipeline (Random Forest) predicting panel efficiency from real-world sensor features.
- Implemented preprocessing, feature engineering, model evaluation, and a Streamlit interface with CSV upload and live predictions.
- Stack:** Python, scikit-learn, Pandas, NumPy, Streamlit.

EDUCATION

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech, Computer Science & Engineering (AI & ML) • CGPA: 7.32 / 10

(expected)

Nirmal Convent School, Sonebhadra

2021 – 2022

AISSCE (Class XII) — 76%

Nirmal Convent School, Sonebhadra

2019 – 2020

AISSE (Class X) — 90%

CERTIFICATIONS & ACHIEVEMENTS

- Certified LLM Security Professional (CLLMSP) — Red Team Leaders (2026).
- Copado AI Certified Professional (2026).
- NPTEL — Cloud Computing (2025), Internet of Things (2026).
- 1× Hackathon Winner and 2× Runner-up.
- Active competitive programmer — LeetCode, GeeksforGeeks (160-day challenge), Codeforces.
